DIGITAL AUDIT & WHAT WE ARE FIXING

Fix the friction. *Capture the generative search AI wave.*

Davrin, Curt — during our audit and demo review of apexinvest.co.za and your current digital touchpoints, we identified the core friction points our engineering rollout resolves:

TOUCHPOINT	CURRENT STATE	MY ENGINEERING UPGRADE
Website Performance	WORDPRESS AUTOART	We replace heavy PHP rendering with an Edge PWA storefront loading in under 1 second on mobile in Newton Park.
AI Search Visibility	ZERO SCHEMA	We inject native Vehicle JSON-LD markup so ChatGPT, Perplexity, and Google Gemini cite Apex cars directly.
Social Media Assets & Presence	INCOMPLETE / MANUAL	Recreation of all social logos, banners & assets, plus setup of missing profiles across GBP, LinkedIn Business, Facebook & Instagram , powered by TruSocial.
WhatsApp Link Sharing	STATIC LOGO	When your sales team shares a car via WhatsApp, tru-share dynamically renders an OpenGraph image card with price & mileage.
On-Site Finance UX	STATIC FORM	We embed tru-afford and tru-repay sliders so buyers calculate SA bank repayments on your site instead of leaving.
Yard Appraisals (Phase 1)	PAPER / MANUAL	Your floor staff use TruInspect (PHASE 1) PWA to generate digital 1-10 condition reports with damage pins & customer e-signatures.

AEO & SEARCH ENGINE SUPREMACY AUDIT

Buyers in Gqeberha ask AI assistants: "Where can I buy a clean SUV under R300k in Port Elizabeth?" Here is how Apex's current code compares to TruDealer's AEO standard:

CURRENT APEXINVEST.CO.ZA MARKUP

```
<!-- Unstructured WP Meta -->
<meta name="description" content="Find your Dream Car Fast... Audi BMW..." />
<meta property="og:image" content="https://apexinvest.co.za/.../Apex-Logo.png" />
<!-- Zero Vehicle schema found -->
```

Result: AI search engines reject unstructured text string dumps. Apex inventory remains invisible in generative search summaries.

TRUDEALER NATIVE AEO JSON-LD STANDARD

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Vehicle",
  "name": "2021 Volkswagen Polo Vivid",
  "offers": { "price": "219900", "priceCurrency": "ZAR" }
}
</script>
```

Result: AI search engines directly parse car specs, pricing, and mileage, ranking Apex at the top of local AI query answers.
