

Run the floor *from your pocket.*

TruFlow Mobile puts your leads, stock and deals on your phone — chase an enquiry, add a walk-in, check a price without walking back to the desk. It's the companion to TruFlow Premium on the desktop, and for smaller dealers it's the whole show on its own.

JOB A • ON THE FLOOR

Work your *leads*

Catch an enquiry, log a walk-in, and move it down the pipeline — call and WhatsApp in a tap.

NEW → CONTACTED → NEGOTIATING →

WON

WORK A LEAD ↓

JOB B • THE CARS

Manage your *stock*

Add an arrival, set its price, and publish it to your website — photos come from TruLens.

ADD → SHOOT IN TRULENS → PUBLISH

MANAGE STOCK ↓

What it is & who it's for

TruFlow Mobile is a phone app — it installs to your home screen and runs full-screen. Which role it plays depends on your dealership.

Companion

If your dealership runs **TruFlow Premium** on the desktop, this is your floor companion — everything you do here syncs both ways with Premium.

Standalone

For a smaller dealer it's the **whole system** on a phone — leads, stock and deals, no desktop required.

Your phone	Any modern phone browser. Open app.tru-saas.com — on a laptop it shows a QR code to open it on your phone instead (or a link to TruFlow Premium for the full desktop DMS).
Your dealer code	One code — the same one you use on desktop and across the TruDealer apps. Your dealer principal issues it; there's no self-signup.
TruLens for photos	You add a car's details here, but its photos are shot in TruLens — a car saves unpublished until it has a gallery.

Install it on your phone

Add it to your home screen once and it opens full-screen like any app, ready on the floor.

01

Open the app

In your phone browser, go to app.tru-saas.com.

02

Add to home screen

iPhone (Safari): tap [Share](#) → [Add to Home Screen](#) → [Add](#). Android (Chrome): tap the install banner, or the menu (⋮) → [Install app](#).

03

Open it from the icon

Launch TruFlow from its new home-screen icon — full-screen, no browser bar, and it works offline for the app shell.

ON A LAPTOP?

Above a certain width the app shows a hand-off screen instead — “*Your TruFlow Mobile companion — manage leads, stock and deals from the showroom floor*” — with the app.tru-saas.com link, [Copy link](#), [Email the link to yourself](#) and a QR code to scan. For the full desktop DMS, open TruFlow Premium instead.

Sign in

The opening screen is the **TruFlow · Mobile** wordmark and one field.

01

Enter your dealer code

Type it into **Dealer code**.

02

Tap “Sign in”

It shows **Signing in...**, then drops you on Home. If it says *“That code isn’t recognised,”* check the code with your dealer principal; *“Can’t reach the server”* just means try again with signal.

SHARED HANDSET?

Signing out clears everything cached on the device — leads and stock included — so the next person to sign in never sees another dealer’s customers.

Around the app

A slim top bar, and a bottom nav that's always in reach with your thumb.

The top bar

Three controls sit up top: the [How do I...?](#) guide (question-mark), [Dealer Assist](#) (the chat bubble), and your **Account** avatar.

The bottom nav

Home — your floor at a glance

Home greets you by dealership — "*Your floor at a glance*" — then lays out your day.

- **Your numbers** — a grid of the KPIs that matter today.
- **Follow up** — the leads that need you, with [All leads →](#) into the full pipeline.
- **Recent stock** — your latest units, with [Manage →](#) into Stock.

Pull down to refresh at any time.

Leads

Every enquiry in one list, with the fastest possible path to a reply.

Find & filter

Search with **Search leads**, filter by stage, and sort (Newest / Oldest / Name). The stages are:

Tap **Walk-in** to capture someone who's just walked onto the floor — a new lead in seconds.

Work a lead

- 01 Open the lead sheet**
Tap a lead and its detail slides up. Up top: **Call** and **WhatsApp** (one tap each), the enquiry message, and the car they're interested in.
- 02 Move it along**
Use the status stepper — **New** → **Contacted** → **Negotiating** → **Won** — tapping the stage the lead has reached.
- 03 Log what happened**
Drop a note ("What happened? e.g. Left a voicemail, will try Friday") so the timeline stays honest, then **Save**. It syncs straight to Premium.

REACHING NEGOTIATING MATTERS

When a lead hits **Negotiating**, its deal opens back in TruFlow Premium's **Deal Readiness** — so the desk can start the paperwork while you keep working the floor.

Stock

Your inventory in your hand — search it, check a price, publish or pull a car.

Find a car

Search with **Search make, model, stock #**, filter (**All** **In stock** **Live** **Sold**), and sort by newest, price or mileage. Each card shows a **Live** or **Unpublished** pill, the price and quick spec chips.

Open a car

Tap a car for its detail sheet:

Website toggle Flip it **on** to publish the car to your website, **off** to pull it.

Status Segmented control: **In stock** / **Sold**.

Pricing The asking price alongside **TruPrice**, so you can see where it sits.

Save / delete **Save** commits changes; the delete button retires the unit.

Add a vehicle

The **Add** tab is a short two-part form — the car, then the money.

01

The car

Year, Make, Model, Variant / trim, Body, Fuel, Transmission and Mileage (km).

02

The money

Asking price (R) and TruPrice (R).

03

Add to inventory

Tap **Add to inventory**. The car saves **unpublished** — “shoot in TruLens to go live.” Open TruLens, shoot that stock number’s guided slots and export; the gallery flows back and you can publish it.

Activity & Account

Activity

A running timeline — “*What's happening across your dealership*” — grouped by Today / Yesterday: new leads, vehicles published, photos uploaded, deals closed, price changes. It's the shared heartbeat of the floor.

Account

Your profile with your **dealer code** shown back (the one string you read out to support), a [Support](#) row that opens WhatsApp, and [Sign out](#). Signing out clears the device's cached data.

Getting help

Two helpers live in the top bar, and neither leaves the app.

? How do I...?

Short job walkthroughs tuned to your screen (the main one badged **Start here**), each a few numbered steps — with a WhatsApp “**Still stuck? Contact support**” at the bottom.

◆ Dealer Assist

“*Ask me about stock, leads, pricing — whatever you need on the floor.*” Tap a suggestion (best seller, leads this week, stock over 60 days) or type your own.

RULE OF THUMB

The two tabs you'll live in are **Leads** and **Stock**. Chase the enquiry, keep the car's record straight — everything else on the phone supports those two, and it all shows up on the desktop the moment you save.

The TruFlow Premium mobile companion — and a standalone system for smaller dealers: leads, stock and deals from the showroom floor. Live at app.tru-saas.com; the full desktop DMS is [TruFlow Premium](#). One dealer code across every TruDealer app.
